MEDICAL

Have high cholesterol or at risk for heart disease?

You may be eligible for a clinical trial evaluating a **potential new medication for heart disease**.

The study medication is designed to lower specific types of harmful fats in the blood that current medications don't target effectively - with the **aim of reducing heart attacks, strokes, and the need for procedures**.

What's Involved?

- 9-month study, with 8 clinic visits and 7 video/phone check-ins
- Injections every 2 or 4 weeks
- Health monitoring, blood tests, ECGs, and questionnaires
- All study-related care and medication at no cost
- Close support from our clinical team, and coordination with your regular doctor

 **Pacific Clinical Research**
NETWORK NEW ZEALAND

Who Can Take Part?

- People aged 18–75
- Have high cholesterol or triglycerides
- Are at risk of cardiovascular disease
- Are currently on medication for cardiovascular risk or cardiovascular disease

Why Participate?

- Help develop a new treatment for heart health
- Access specialist care and monitoring
- Compensation for time & travel
